**Subject:** FW: Dates for Availability of Study Data

**DSS:** No

Bill:

Martin indicated that the clinical conduct of the main exercise study will be in September, therefore, we expect to have data available by the end of this year.

If you need any further details in the interim, please let us know.

Thanks,  
Valerie

**Subject:** Dates for Availability of Study Data

Bill:

Mike Werley came to me this morning regarding your request for dates for the exercise study currently underway in South Africa. The project leader for this work (Martin Unverdorben) is currently out of the country. Until he returns on Monday, I can not provide you with this information.

Due to some issues with equipment for the study, we had to initiate a pilot study to ensure that we had corrected any potential equipment performance problems. As a result of this, the start of the main study was postponed. The study timelines in my file need to be updated. Unfortunately, I need to confer with Martin to obtain the most up to date plans.

I've copied Martin on this e-mail so that he is aware of your request, and also to let him know that your group is interested in the results from this study.

Thanks,  
Valerie
